

and is in memory of Thomas Kemp Tutor at the Castle, some remain of which are still in existence.

I am glad to learn that the St. Kilda Sheep are doing well and that you have secured some of the four horned variety. Can you establish a near relationship between them and those whose bones you dug up some time ago?

I am Dear Sir,

Dear Sir,

I received yours relative to the Monumental Slab in the Church Yard here, and so soon as the weather permits I shall be glad to send you a rubbing and drawings.

I took a rubbing some years ago for my brother at Jalspie from which he was enabled to decipher most of the inscription but I regret to say that, owing to the stone being in a horizontal position, the inscription is becoming more indistinct.

The date is, (quoting from menzies) either 1531 or 1533.
