

1.
THE ADELAIDE CLUB.

17th ap/94

Dear Mr. Spencer

I am gradually
getting things focused
here and think we
can get a start on
the 3rd may

re photography I
am having a small
dark tent made
one that can be
suspended from
the branch of a tree
like a huge extinguisher
about 4ft in diameter
I am going to take

a $\frac{1}{2}$ plate Camera
with rapid rectilinear
lens, and glass
plates.

You need not bring
any rapid plates
for your whole plate
Camera as in
the bright light of
here one can
get splendid instantaneous
results with the
ordinary plate.

Please make
your Collecting Blank
as light as is
consistent with

efficiency as
nothing has to be
carried on Camels.

Have you ever tried
the "Fondens" developer
it is splendid for
traveling as it is
a one mixture solution
and I find gives
good results when
used even a dozen
times it is a
mixture of Hydroquin
"Eosine" & can be
had at Baker & Ross.
I told Stirling

to write you to enquire
Kearsland

Believe me
Sincerely
W. A. H. H. H.
