

3. Inisfail Hills Road
Cambridge

July 27 1907

My dear Spencer,

I have often wondered where
you were and how you were getting on -
I suppose you will very soon strike
civilization again -

All your English colleagues are
eagerly looking for news of you and
are anticipating grand results - that is
if you have any luck at all - Let
us hope that no disaster will destroy
or diminish your collections or notes.

The Report of our Expedition is
being published, but it takes a long time
When you come to England next year
will see the early volumes published.

I am having a trip in the U. States
this autumn - I start on Sept. 21 &
return in middle of December - I am

Very desirous of studying American
Museums - courses of study & methods.
I expect to return very disappointed
with my country.

Trojan has made a connection
with the Q & Q. Dr. Golden Bonyk
his explanation of the Micropisus has
not unreasonably for strongly interested
especially of Andrew Lang - who is
forming a committee of the "Robbery"
it is by course - but I am afraid
that Trojan takes it rather hardly -

I fancy Mr. Trojan makes far
too much of it & appreciates Trojans
sensitiveness. His eyes are too
and he has gone to Germany to consult
a specialist - his wife thinks it is
very serious - but one can never

3
trust for account of anything - It
could be dreadful if it should
prove to be serious.

Then you can explain to write
you never told you should come
to Cambridge to work at it. It
would be very folly to have you
hardly & to compare notes to
you about an experience -

I have now resigned my Dublin
Chair in order to devote myself entirely
to anthropology & to establishing the
subject in Cambridge - It is
slow & uphill work.

Taylor has not been very well
but he is much better now - he is getting
old - Balfour too has been seventy -
it is a great pity he is so delicate.

do you know Prof Ridgway - or
Sirkey Prof of Anthropology? He is a
great man - you would be delighted
with him -

Please give my kind regards to Gillen
I hope he will come to England too
so that the British anthropologists
may make his acquaintance
& congratulate him in person on all
he has done -

With the best wishes
Believe me to be

Yours very faithfully

Alfred C. Haddon
