My dear Spencer,

I remember once  
writing to ask if you  
knew anything of the  
late J. Archibald's sup-  
posed discoveries of  
human foot and  
"posterior" imprints in  
the consolidated sand-  
dunes of Warrnambool.  
Your reply I have mislaid,  
but the impression on my  
mind is that you said  
you had seen them &  
there was nothing in it.  
Am I right? I can  
quite understand them

is nothing in the "posterior"  
 business, but do you  
 know if the tracks of  
 humans & animals  
 have actually been found  
 in or on slabs taken  
 or quarried from within  
 these consolidated dunes?  
 Not merely seen on the  
 sloping talus of the  
 dunes - Any information  
 will be welcome -

Faithfully yours,  
 R. Etheridge
