

Hice Springs
March 15th 1900

Dear Professor

By the mail
I am sending you some
animals which have been
bottled at Barrow Creek
for some time thinking
there may possibly be some
thing new amongst them.
If there is any thing in
the way of Information
&c which I can collect
for you at any time
dont be afraid to drop
me a line. The place
very well now the Gilber

2

family have gone. Not quite used to the new people yet. I found two graves of several native dogs around Barrow creek dont know if you have heard of that before. A large number of your old friends (native) have died since you were here some of the Southern germs carrying Hooping Cough Influenza etc up this way. Soon makes short work of them. Season very dry. Trust yourself & family are quite well. Kind Regards
Yours Sincerely
J. W. A. Berley
