

Ellamurta
30th Sep 1900

Dear Professor.

Yours to hand and I am very glad that the Petition was satisfactory in getting your leave and only hope the monetary part is satisfactorily settled. It is one thing for Scientific people to sign their names & another to put their heads in their pockets, but probably they imagine that the "kudos" should ample repay you for the trifling outlay that a year's work in the Bad Blocks where locomotion & everything else is so cheap entails upon you - still work

me pretty fully on the subject & I have replied in kind & suggesting Ely frog
Selling as a means of raising the
wind. I was in at Alice Sp^t a fortnight
ago & found the place very different
to the old times & the Telegraph Station
much drier except for the surreptit-
ious bottles in various of the quad-
rangle rooms. The Police Camp
menage was ghastly & I was very
glad to get home again even although
I found all hands as bad as ever
with colds & have suffered a relapse
myself. no sense of taste or smell
whatsoever & just a feeling as if I
had been belted all over. Gabriel sent
me some stuff for the boys but says
the epidemic will not go away till
the hot weather comes & then one can
do little or nothing. I sent Odenben
down with the Blacks & may not

be writing to you much mail, as
I will in all probability be down
the road over the elections to escort
my vote & largearnts from the Board
of Charlotte Waters. I note your rewards
are less & am glad they are coming
on slight, I can't yet get good conditions White or Brinsford or carried up
Lynden. I have my eye on a shrub
in Spilla paddock, the seeds were not
ripe when I was here a few weeks
days ago nor did I catch it in bloom
this year but I always intended getting
the name of it from someone, for
Spilla paddock is the only place I
have seen it - hundreds of blue balls
like pin cushions & very striking.
will center down & see if a
horse comes in today, in time.

I think we burnt that big
principine bush in the Palmer force of the
mig. caseo. French has

or Blacko dis, for it is no more,
I note the sarcastic singe of your
rewards on the subject of the Convict
at that & other spots but you must
recollect that I prides myself on keep-
ing appointments with Blacko
or slight, I can't yet get good conditions White or Brinsford or carried up
Lynden. I have my eye on a shrub

I think we burnt that big
principine bush in the Palmer force of the
mig. caseo. French has

always been asking for them but I
could not send him any by mail.
They are always plentiful here about
Xmas & a curse in the garden on
the Tomatoes but they get shattered a
lot with the gun if a big one & are rather
too cunning for the little one. I have
seen no *Polyptilus alexandri* since
1896 & I do not think they are in
the country anywhere at present.
They are rather an enigma but may
appear at any time again. I got
a long enough box at last & packed
up for you goods as per enclosed list.
I must try & get a second box
filled somehow to balance it so
that these independent carriers
will take it away for me. I picked
up a boomerang whenever I see
one but pitchis are awkward they
take up so much room & weigh

nothing - hope you got my long bundle
 of notes. Got several Churina on my
 way back from Alice \$3⁰⁰ as two old
 bards met me on the road - they swore
 they had not manufactured them ^{to}
 sell & as two had hair strings on them
 evidently had been used, perhaps
 they were telling me the truth but
 they are newish, they are to bring
 me more by & bye & I will get details.
 I cannot get old Churina-puppi
 from Mareena Bluff so as to get
 the particulars of my two cherished
 Snake Stones. which are about 14 &
 18 inches respectively.

Martin is trying to get rid
 of Tempe, he has moved all the
 cattle off & the place is under
 offer to Kidman with the plant
 & houses at about \$800 I think - I
 was a fool not to snap it when

I has a chance & now it has slipped his phosphorus paste last night
me - you see I had a notion of going but did not go down to the garden
up the Bush & settling but that is still after breakfast, well gone again
knuckles on the head and now I only but crows has taken all the bread so
want to stay in the Bush. Maktia I could not say if the mice had
is a real good fellow but he will also a feed - found two dead crows
never made a do out there for he this afternoon at all events.
always requires assistance & is good luck & good wishes to you
what one looking on, is forced to both.

Yours sincerely,
Ernest Cowle

Please thank Mayspencer for kind
enquiries, I hear Chapman her
sister go to Miss Chambers school.
Mrs Domestico is very thick pick
now again, their latest game is
to root up every melon, pumpkins
cucumber sees you put in & I
don't know how to block them
