

Gresham Hotel  
Adelaide

Wednesday Sept 11/95.

My dear Spencer -

Your various notes to hand I have only time to scribble you a line or two. I have had three interviews with Stirling since with him & accompanied him to lecture before Austn Natass Assn subject the dinosaurs at Lake Callacoma (Deponation etc). He thoroughly understands that I am not prepared or rather disposed to furnish any further information for Horn volume & seems to think it would or were patriotic to publish papers thro Royal Society here says he was

information about the Slaves but of course  
I have given <sup>him</sup> to understand in the planned  
private for our English that I shall not give another  
scraps of information upon any subject - This  
manuscript already amounts to 100 pages foolscap I  
am to see it next week - In introducing me to  
some of his friends at the Club he mentioned  
that I was contributing a "calculus paper" to the  
Athenaeum volume - Judging from our various conversations  
I believe he intends to deal absolutely fairly - I  
will write you more fully later on at present  
we are engaged up to the hilt among shopping  
&c &c I am beginning to get full of it  
all & shall face the homeward journey with  
delight. Would that you could come with our  
old folks - About papers &c do just whatever  
you think advisable - I am entirely in your hands  
now & hereafter - Nothing is sending you the  
notes he would have taken them gladly at the  
same figures let me know if they reach you safely  
Best love in kind regards to the W. & C. & C.  
Send love - Please remember me to Mrs. Jones  
& give my love to the Address Slaves

Yours humbly

J. J. G.

Don't work too hard. It would give me ~~to~~ to hear  
of you breaking down. I am afraid that I am ~~at~~ throwing  
extra labour upon you already overloaded shoulders

12

attended by purely patriotic motives  
in publishing his paper on  
Motorycles in the Colony he  
has begged me to re-examine "whether  
the Royal Society of our own  
Colony should not in the regions  
of motion so essentially South  
African" &c &c &c. I told  
him yesterday at the Hospital,  
where I went to see him perform  
a Caeser operation, that my mind  
was thoroughly made up on the  
subject but that I might later  
on publish a paper through the  
Society. He has been extremely kind  
& nice & is most anxious that we  
should visit him at Mt Lofly for  
a few days this I am afraid  
is not possible with the limited  
time at our disposal. We go  
particularly anxious to get further

Graham Hotel

Wednesday 21/11/45.

My dear Spence -

Your various notes to  
hand I have only time to scribble  
you a line or two  
I have had three interviews with  
Shelley about with him &  
accompanied him to lecture before  
Austin Nelson when I suggested the  
obscure as Lady Callaghan  
(Deposition &c). He thoroughly understands  
that I am not prepared or rather  
desperant to furnish any further  
information for those volume &  
seems to think it would be most  
patriotic to publish papers thro  
Royal Society here says he was
