

Woola

22/7/03

My dear Spencer

10pm I am just reading  
 the last lot of proofs read  
 today - At page 83 see remarks  
 about "Miniwela the exact  
 significance of which we could not  
 ascertain" I am strongly of opinion  
 that it represented the light  
 of rising sun - before it quite  
 made its appearance - & the  
 after glow just as the sun  
 goes down in the evening. The  
 Zulus attempts - Lockneys - to explain  
 its meaning occurred to me just  
 now & I remember Zulu bidding  
 me watch for the light at Simons  
 kabeo long a previous day light  
 The whole thing represented I feel

precisely save the <sup>downing of the</sup> gift of liquid  
heat (warmth) to the Kingless

Thud it over. I am just  
going to drink to you in  
a form of Thud

Heath
