

June 13-84

Dear Howard

The list is just out
 & I am very glad to say I have
 got a first. I had a most
 enjoyable visit today as Moseley &
 Sawyer simply congratulated me
 on the "excellence of my work" instead
 of physics questions. This which is
 very seldom done taken together with the
 fact that I am only the third man
 who has ever got a first at the end of
 his third year in Biology makes it a

satisfactory ending up here.

However I shall be up next term
 as Mandy has offered me a little
 work to do & also I shall endeavour
 to get pups' to come to the out on a
 little store of cash.
 I have only a few minutes in which
 to write so must stop.
 Please remember me to Mr & Mrs Gault
 & also to Miss E. I am coming
 down tomorrow & so may see you soon.

MRS.
