How would "The northern Tribes of Central Australia" do for a title? It would be quite exact, and as short as "The native Tribes of ~~Central~~ Northern Australia," which is inexact. On the other hand it would not range so well with your former title "The native Tribes of Australia." But it would not be so liable to be confounded with it. On the whole I incline to recommend "The northern Tribes of Central Australia" as the best title for the book.

I trust that all goes well with you on your new expedition.

Yours ever
