Salisbury.

Jan 31. 81.

Dear W. Crook.

In estimating the value of
Bridson's cleared down + Rushmore
 farms have you counted the reduction
 consequent in the reduction of the
 price of corn during the last 7 years.
 This must be taken to be considerably
 into the system now. I have no reason
 of seeing whether the proper reduction
 has been made. Plans - cannot be.
 I find them in complete accounts
 and should be corrected. For example

from the
gradual

If I find that the change
23 £ per ~~acre~~ coltage rents
since the coltages are included
in the estimated rents of the
farm this will reduce the
estimate of 23 £ of the coltage
rents an amount to be
assessed.

Is the probable value of the farms
changed by the assessment of
the poor rates?
