Dear Sir

I saw in receipt of your esteemed favour.
I can supply two cabinets of the very best
workmanship of the following dimensions
Height 15 inches Width $11\frac{3}{8}$ in Depth $11\frac{3}{8}$ in
containing 28 trays (each) the trays pierced
with $1\frac{1}{4}$ holes 49 holes in each tray
 7×7 . thus each cabinet will hold $13\frac{1}{2}$
coins, if the two are beyond your require-
ments I can offer one; if on the other
hand should you prefer two cabinets of
smaller size I could have them made
for you to any pattern as I think it very
unlikely that you will find two cab-

kindly let me know exactly the size you

mark the holes (which you do not mention in
your note) and the number of trays in each
cabinet I will forward you an estimate.

Dear Sir

I am in receipt of your instructions for the two coin cabinets but before putting them in hand think it better to advise you that the estimate forwarded you to £5/- each was for mahogany cabinets, the wood most usually employed and the cost of making them in rosewood according to drawing and with flush handles will be £5.17.6 each. I should also be glad to know if the doors of the cabinet you have are with flush or sunken panels, if you could spare the case and one tray of the cabinet you have and would forward me same it would ensure

absolute uniformity.

I have a small cabinet the counterpart of yours with ebony fillet and eading but it is in dark mahogany.
