

58 Acre Lane, London, S.W.
July 2 - 94

Dear Sir,

In the valuable record of your excavations in the South Lodge Camp, which I have just read you mention a bronze looped Spear head, and quote an example figured by Dr. Thurnam from Wilsford, Wills.

The locality is an error, and it was not, strictly speaking, found in a barrow. I should be glad to correct the mistake.

My Grandfather, Mr. Cunningham

found this implement in group
14 near Stonehenge, (near the
Barrow in which the large
"Stonehenge" urn was found) im-
mediately under the turf. He
mentions it as being similar to
one figured in Gough's Camden III.
pl. 39. fig. 3 -. It is in the Wills
Museum at Devizes. The original
drawing of it is in my possession.

The circumstances of this find
quite confirm your views as to
the age of these weapons -

There is another specimen of
the same form ~~to~~ in the Wills
Museum, which was found, just
under the turf, on the open downs
near Beckhampton.

Believe me

Yours faithfully

Wm. Cunnington
