

Muskau / Silesia

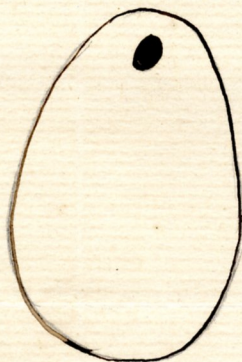

Prussia.

July 6th 83

L108

Dear Sir.

I found to-day within
a cinerary urn two more Bronze
rings and a stone ornament of
this shape and size:

It was evidently an ornament to
be worn around the neck as it
has a hole drilled in at the top
for a string to pass through...

I am willing to include these in
the collection of which I sent you
drawings...

truly yours,

E. Clement
