

merits special examination
I shall be glad to know.

I think it right to say that
I suggested your name to the
L.C. Council when they pro-
posed to me to undertake it
but they seemed to think that
it was like throwing me over,
though I had no feeling of
the kind.

I am very glad you happened
to meet my friend Mercer
when he came to your Museum
He is a most charming fellow
and a great enthusiast on
pre historic matters.

Yours very truly
Frank Pitt Rivers

Dear General Pitt Rivers

I have today seen Garrison
who came to look at the
barrow here that the County
Council have proceeded
me to undertake, and he
tells me there is a possibility
of your coming up to town
If so I should be glad to
see you at the barrow
which turns out to be a

Much more serious under-
taking than I thought
when I casually looked
at it about a year ago.
It is about 50 yards in
width in diameter and
about 7 ft high in the
centre with a well defined
ditch - and through the

General plan is fairly

circular, the mound itself has
an extension to E + W.

I have made a large
opening about 16 ft
wide on the S. side

& thus I shall continue to the
centre - then take a section
of the E + W limbs of the
mound - and if time & money
holds out make two or
three sections of the ditch.

I am taking your barrow
records in your second vol.
as my guide for the method
of recording the heights &c.
and if you can think of
anything that from the
data I have given about
above
