And. 4 Bones
returned.

Jan. 4/95.

Dear Sir.

May I be so bold
as to ask you to class-
ify these ~~bones~~ pieces
of animal bone? Some
I am afraid are impos-
sible to do this with
as nos: 38, 41 & 42.

They are from the
Wookey cave, Somers.

They were found by Mr. J. Squire, from whom I heard 45, 47 & 48, were the teeth of a rhinoceros, horse and hyena respectively. I send the catalogue of the little collection of which these bones form part. The Rev^d E. H. Goddard, Editor of the *Wiltshire Archaeological Magazine* is my second cousin. If it is too

much troubling you, will you send the bones back, or if you are so kind as to take the trouble, would you put the result in the catalogue, and return them to

yours very truly

J. G. Wilson
