to those who resort to our "Reference" library
works of a high standard - higher
aided than we can afford to acquire by
purchase & having heard of your
generous gift of copies of the important
Antiquarian works which you have
issued, in quarters where you thought it
might promote the study of archæol-

Free Library might participate in
your munificent encouragement - for
aided when the previous necessary
purveys & the subsequent production of
the Vol. & the unsolicited reports returned
upon the plans to is considered such
gifts are rightly called munificent. With
many apologies to this application
