

Make me desirous to consult  
you.

At the same time it would give  
me great pleasure, if you and  
any other members of the  
Dorset Natural History Field Club  
who are interested in the Geology  
of the Vale of Wardour, will  
come over to Tisbury, where  
I think I can make the local  
Geology very interesting by pointing  
out the various strata & sections  
I remain & remain yours!

Yours sincerely  
W. R. Andrew

P.S. Any loan after the 20<sup>th</sup> of August would  
suit me very well.

Tisbury Rectory July 27<sup>th</sup>  
Salisbury 1883.

Dear Sir  
It seems to me  
that if you have a paper on  
Geology read, during the  
very limited time you could  
have to spare, with so many  
objects of interest in your  
neighbourhood, it ought

to be on the Chalk,  
as the only formation  
within reach.

Now, although I have  
worked for some years at the  
geology of the vale of Wardour,  
I have had very little opportunity  
of becoming practically  
acquainted with the Chalk  
of Dorsetshire. I could,

therefore, give no new information  
on the subject, and you  
may probably have members  
of your Field Club present,  
who have made a special  
study of the Chalk.

It was this doubt  
as to my being the fit  
person to write about the  
Chalk of Dorset, that
