My dear Father

Will you send me  
a tracing by return of  
post of the elevation &  
plan of the Theatre  
I went round to Walker,  
who says he will knock  
it into shape for me, if  
he has a tracing.  
In the meantime, could  
you stop all further

operations on the work,  
as regards the pilasters  
being too broad I believe  
they are 2 feet at the  
base & for a pilaster  
20 feet high this is none  
too broad, in fact they  
could not have been less.

There ought really to have  
been 2 pilasters on each  
side, but Walker will  
try & make that alright  
and if you will send a  
tracing I will take it

round immediately &  
let you have it back as  
soon as possible.

Of course Walker won't  
charge anything, he is  
doing it for me.

I am afraid I was not  
quite the right person  
to employ for classical  
work, but I did my  
best, and did not like  
to decline undertaking  
the job. Juffab
