

L121

21, John Street.

Bedford Row, W.C.

Aug. 8th 1883

My dear Genl. Pitt-Rivers,

"Loughton Camp Committee of
the British Association."

We have now got together all
our evidence resulting from four
sections through this earthwork &
are waiting to draw up a report
to send in to the Southport
meeting next month. It is
essential that you as a member
of the Committee should see
all the specimens & give us
the benefit of your opinion
upon them. Mr. Cole &
myself would therefore be much

obliged if you could name some evening next week when we could call upon you with the relics. An hour would enable you to make comments & look through the whole series. An early reply would oblige as there is not very much time between this & the meeting to get all things arranged & the drawings completed.

Hoping you are well,

Yours very truly,

R. Meldola.

If you should be engaged or going away, one night this week would do. Please name your own time.
