Zoological Society's Gardens,

TELEGRAPHIC ADDRESS,
"ZOOLOGICAL, LONDON"

Regents Park, London, N.W.

July 26 1886

Dear Sir

I have to inform
you that the pair of
Yaks, one not both
black, the female is
entirely black, the
male black, except the
a white patch on the
forehead and the white
tail. This animal is more
like the wild Yak than
the domestic one, I am
certain the pair are pure
Yaks, and not of mixed
origin.

Yours faithfully
A. Bartlett

A. General Pitt Rivers
