sent on
Mar. 6/96.

I have sketched in
lead to day 30 primitive
implements for the Chase
Platium.

Instead of 25 representing half
30 sent for which I ask
10 guineas. for this reason
having been incessantly at
work on this line for the
past 10 years I really
need a change to a holiday
so with the funds I hope
to occupy myself for expenses
& time and the odd shillings.

go towards a holiday fund &
a scamper was the of course
to follow up some observations
made 10 yrs since -

Therapy in denials I have
not trespass on your
indulgence too far

Believe me to clear up
this matter and to fight
against the Hand stamping
front has been an ex-
haustive trying ordeal, but
I am glad now we have
had a hard tussle

Went by request at my Paris to
the Geological Museum. Jeanne
Stark. Mr E. J. Newton F.R.S.
has care of them.

Alfred in Edita whom I asked
to go there, writes. July 27.

Dr Mr Hanson

Had nearly an hour with
Mr Newton this morning
He tells me he finds himself increasingly
on your side
He will show you exhibits at the
next meeting Zoologists Association
He quite sees that people cannot
be cured and that the question
is in a transition stage but moving
in the right direction (even
Evans is not so incurable as he was)
