Queen's Faculty of Medicine.

TELEPHONE No 68.

Prof. Windle, M.D., D.Sc.  
Dean.

November 11<sup>th</sup> 1896.

Dear Sir,

I am exceedingly grateful to you for the books which you have been kind enough to send me. They will be exceedingly useful to me. I shall certainly avail myself of your kind promise to show me round next year & will write to you some time probably so that I may not cause you any inconvenience. I will see our Librarian & have your

books put on the general shelves & I hope we may be allowed to have the 4<sup>th</sup> vol. when it appears -

I am ever most  
your kindnes back a  
further favours - I am  
bringing out (through Mr  
hull) almost immediately  
a little book on "Early Britain  
Its men & monuments" which  
is intended to give a pop-  
ular account of the early  
races (at the end of the paper)  
& particularly of the relics  
which they have left. It will  
be illustrated & I should feel  
very grateful if you would  
allow me to use the art-  
of Woodcut, Village, etc.  
illustrated my friend

D. Gausain's papers in  
"nature" - An hunt  
would take every care of the  
block - if the block was  
gone - See that your  
publishers had it again  
when finished with.

with apologies for  
again troubling you

I am

Yours faithfully

Arthur C. Christie
