

marked out <sup>in</sup> your plan  
called "Naboths Eyesore" with  
the exception of a small piece  
on the west end. I have been  
up on the hill today and  
put up some stakes where  
the proposed boundary line  
should go from the corner  
of yr wire fence at Horse down  
clump to the <sup>road from</sup> Ferne hollow  
road. The alteration in the boundary  
from that shown on your plan  
will not make any <sup>material</sup> difference  
to you. ~~I should like to show~~

Monday 22<sup>nd</sup> Feb 87  
Ferne, Berwick & John  
Salisbury.

My dear General  
I have been thinking over  
the matter of Naboth, and  
your suggestion of a valuation.  
I dont think would help  
matters; for if the valuation  
did not come up to the  
sum I have made up

my mind, it would not  
be worth <sup>any</sup> while to  
sell it under, It would  
not forward matters. The  
agricultural value of the  
down end of a farm taken  
by itself without buildings  
must naturally be out of  
proportion to its value as part  
of a farm and owing to the  
situation of the land its

sporting value is considerable  
to the owner of Ashcome. The  
very least it would be worth  
my while to sell it for would  
be £3.500 This is a great  
reduction on what I originally  
asked but I am anxious to  
meet you as far as my interests  
will allow. For three thousand  
five hundred pounds I would  
sell all that you have

like to know before

then

L1753

Ferne,  
Salisbury.

I should like to know  
at once if you ~~are~~<sup>wish</sup>  
to buy the land as I have  
today stopped the plough  
teams from ploughing up the  
piece of old field joining  
you, that would be put  
into oats this year as I  
thought that if you  
really wished to buy

and  
gradually

The land you might  
wish it left down to  
grass

Latter Jove

P.S. Of course this is  
only if there is no  
legal hindrance. I think  
I can manage it but  
I must have a definite  
offer to make to the  
Mortgagees before I  
can say for certain  
I am going up to London  
on Thursday and should
