

I imagine but that is
a legal matter which can
be settled later when I go
to London. I am taking leave
back to school this week

Yours affly

Walter Jones

(L1814)

Bernard & John
Lane,
Salisbury.

May 4th 1893
Salisbury.

My dear General Pitt

Directly you obtain
possession of Naboth as
occurs you will under
the ground game act be able
to kill the ground game
before it is legally conveyed
to you which will take time
I would give you possession
almost at once if you
will take over my growing
crops and tillage at a valuation

Creek and an agent Woolley
could arrange that any
day. Then you would have
the entire possession of the
land and the crops at once
so that you could see about
putting in 1000 grass seed in
the oat crock which by the way
is a very promising one and
is the land prepared for turnips
which I was going to sow this
week but have just stopped them
The High way board I have
written to to tell them that
they must discontinue digging

flint on Nebooth by the end
of this month as I am selling
the land I have given them three
weeks notice as they will have
to get their flint from elsewhere
and its as well not to run
them up the wrong way. What
I stipulate for is that Lord James
has the shooting over the land
during his tenancy as I let him
ferme and shooting with this
land included and I dont want
to disturb him as he might
not like it. You will ~~have~~
be required to pay a deposit
