Dear Sir

I am greatly obliged for your kind letter and information of the 28th ult. which tells me what I wanted to know. The portion of the excavations which is now necessary to make as one has been completed; the remainder will be done in two or three weeks' time, after the foundations have been put in. The designs on the pottery will be carefully copied for publication in the next report of our Society, and the vases themselves will be restored

as far as possible. If it is necessary
to communicate with you again, or to
accept your kind offer of assistance
in the identification of the bones
found, we shall gratefully do so.

Believe me

Yours truly

Edward Meyrick
