

Dorchester. July 31. 1889.

1889

My dear Sir,

Just now I received,
addressed to me but intended
of course for the Dorset
Museum.

Excavations on Handley Hill
& Handley Down.

" of South Lodge Camp.

" on Martin Down

with the following part con-
taining an enay on Chewrow
ornament &c.

These five volumes are in-
deed an acquisition of no
ordinary value.

On turning over the leaves
I failed to see my interpretation

of "Wor Barrow". I did not know of this Wor-barrow, but I have often wondered ~~at~~ what the worms are, in connection with Worbarrow Bay, Purbeck.

Mr Stephenson & I have this morning been in the Town-hall, where we found in a forward state of preparation for the meeting on Aug. 3. I find that Mr Stephenson does not know the size of your diagrams. Mr Mitchell the work-keeper is well accustomed to hang up such things, & expects no difficulty on this occasion. Still it would be well if

a line could reach either Mr Stephenson (King's Arms) or Mr Mitchell (19 Trinity St.) on Monday or on Tuesday morning, giving number and size of the diagrams.

I am
Yours truly
R. J. Meade.
