

L1925

WHATCOMBE,  
BLANDFORD,  
—AND TELEGRAPH—

Sept 2 - 1897

My dear Mr General

The box has  
safely arrived. I will  
look through its contents  
which are one of no  
value in the point of  
view we wish. I long  
to examine the 'Dred'  
side & I think with  
a little policy I shall be  
able to get over the ob:  
structions. I expect  
to find the ditch deeper  
on the unexploded side. N

I am pleased to do this in  
the coming spring. I shall  
not think the time &  
expense spent in vain.  
The more I consider it the  
more I regret not having  
taken the horizontal plan  
which is somewhat the only  
one for tabulating ~~the~~ <sup>the</sup> activity  
the horizon of each vein  
I remain

Ever your respects  
W. Marshall Wardell
