Views Series Part *L1946*

Dear Sir I found your *Je Parce Part*
today III Ethnog. & Views *Je*
Selection (Permanent Platinos) and as you
are so specially interested in this particular
branch of Peurbien work I afford a
few notes which may make many of
the points of more interest. Prof Wadden
has often promised to help me but then
most descriptive notes and I suppose I
will do so some time on the lines of
my Geol. lists the notes of which
Prof Cole always supplies. With the

exception of about 5 or 6 more
Views these III exhaust my set, others
are on the bodalund and come
more especially into the stone times
as indeed the Keltic - Midden View
I send many do, though there is just
the chance that they may be connected
with life at a much later period,
I cannot say more on that subject at
present as a report on the matter will
be presented to the R.I. Academy soon
by some friends. When I accompanied a
little research expedition there and to
the much larger middens at Bunsowen
near Clifden.

I would be glad to let you see my very
early Irish Antiquities, Pagan & Christian at
any time many of the views are unique I have
latter the Camera open to sea, where a camera
was never seen before. Yours R. Welch
