Dear your affec^t
J. M. Marshall - May 20th

(L1960)

WHATCOMBE,
BLANDFORD.
—AND TELEGRAPH—

Date 6. 1897

My dear friend General
It is most kind of
you to give me a copy of
your Presidential address
I cannot conceive how
you find time even to write
it as you only commenced
on the morning which ended
my short but pleasant visit
at Weymouth. scarcely a
week before the meeting however
you know your subject
& possess the pen of a ready
writer and only 2 minutes
have passed and all is

print with 12 plates!
I am glad to hear the
new Nile plate. I had
been trying to make out
the ground from the map
on my return home.

If it is a fine day on the 12th
(Friday) I will ride
over to the diggings and
enjoy a little time with
you, which is always a
pleasure. Mr. Mutton
father a law of Dr. Waller
found *Seceria OTYZOIDEA*
in the water-courses of
the Puddle Valley near
Wareham. It had only been

before in Hampshire
Sussex & Surrey. Perhaps
it is more common than
is generally supposed but
escape notice as the
flowers perianth usually
remains in the sheath
flowering & partly in the
thence secluded. I went
to the spot on Monday last
& found quantities of it
but only few specimens
collected without flowers
How diverse is nature in
her proceedings! all with
one object - distribution
& perpetuation. I'm
sure probably "Historia
