

neighbourhood as I lend the books
to a number who are interested
The men at Broom Quarry
continue to find a number of
new implements there. I have
lately sent some surplus ones
to Owens College Manchester
& they appear to value them highly.
Trusting you are in good health
I remain

Yours most respectfully

James Ralls.

Sir

I have taken the liberty
of sending per parcel post
a little box containing bones
& teeth from Kent's Cavern
near Torquay, as I thought
^{may} they perhaps be of interest
or use in your Museum.

W. Elce, the late curator of the
Torquay Museum, assisted
Dr Pengetty in his explorations,
& received a quantity of surplus
articles when Dr P. left Torquay.

These I now send you I received
from his son H. J. Else of Mead
Cliff Torquay, & should they
prove of service to you, or you
desired others, or further information,
no doubt he would be pleased
to supply it.

as regards the labels on the
various teeth, will you please
have them verified, as although
I tried to preserve them carefully,
they have been handled by
friends, & Else was pressed for
time when he wrote them for me.

I presume you have a loose
copy of Dr Penzance's lecture
on "Cave Men" of the Manchester ^{series} ^{of}
if not, I should be pleased to

send a copy to place with them.
I think that these remains of
wild animals found in this
country, may be of great use
in schools, as boys are generally
fond of Natural History, & these
lead directly to Geology, so
I am making one or two sets
for school use near here.

I regret I delayed acknowledging
the receipt of ^{the} your very beautiful
copy of your Dorchester Address.
I am deeply indebted to you for
it, & can only say that this, as
well as the former volumes
you were good enough to send,
promote the studies in this
