

L2019

Blandford.

11. 12. 94

General Pitt-Rivers,

Sir, I beg to inform you that I have today examined at Rushmore a brown gelding rising four years old.

I find this animal has a small spavin on the near hock; a curb on the off hind leg; a splint on the off fore leg & the "brushes" to hind fetlocks in action. The horse is coughing & has a sore throat. In my opinion these defects render the animal unsound. Although there is some risk in purchasing such

a horse it is quite probable
that none of the defects
mentioned will interfere
with his usefulness & the
price asked for him does
not seem to be excessive.

I am, Sir,

Your obedient servant,

R. Barron.
