W. Manuel-Meydell

L2016

WHATCOMBE,
BLANDFORD.
—AND TELEGRAPH—

Decr. 11. 1897

My dear & kind General
How very and most
kind of you to give me
the interesting photographs
of the burned specimens
I value them beyond
description as I have seen
the diggings in all the
forms they represent. I
saw in my I think
in the act of photographing
one of them. It must have
been one of the last. I

think you will be able
to identify Iburnium as
you did Vondogladia at
Wardgate. I hope to ferret
out much about the
station overshadowed by
Wardgate.

We had a very useful
day with the Field
Club on Wednesday &
a great deal of discussion
with Mr. Huddleston &
Dr. March and myself
on the supposed palaeo-
letter flints from the
neighbourhood of
Wingham & Kent. I
have some other been

to give us a Paper on
the subject. I am anxious
to get these members to
enter into the arena.

My is especially delighted
with the photographs as
I can. I had a good
day with this morning
at Dorchester with the
Technical Committee. I
have undertaken to give at
my Industrial School Farm
in experimenting on the
different kinds of manure.
but failed in getting the
grants at our disposal altered
with regard to those given to
the Borough for Technical
Education which are now
