British  
Museum. 21. Feb.

General Pitt Rivers.

L2050

I beg to enclose  
for your inspection a small  
bronze figure found some six  
years since by Mr. Belliotti at  
Ilyrus in Crete. It shows a  
very unusual form of restoration

the head & bust being removeable  
from the trunk. It is not very  
beautiful but I consider it very  
early & of interest in such a coll-  
-ection as your own. It is a  
question whether the ancients have  
been putting "old heads on young  
shoulders" or vice-versa.

Should the bronze prove of interest  
to you, I will dispose of it for  
10/6. I beg to remain  
Yours respectfully  
A. P. Ready
