

Savannah just now clear  
in the sunny part a  
terrible scrover wind is  
blowing great fun and  
taking every atom of  
farklone out of me

Doan remember us  
most kindly. & Mrs Pitt-

Green believe me

Yours very truly

W. Maxwell - Heydell

The wind is so unpleasant  
here we intend moving  
in about 1 hour on  
Monday.

(L206)

Hotel Victoria

San Berno

April 3. 1886

My dear friend Mr Pitt

Perhaps you will  
forgive me for writing  
to you upon the following

subject, but since  
dear Harry has been

taken from us we

have a desire that

our clergyman in

the I hope live

nearer us than Westfield

and I venture to ask

if you have no near

relation a friend to  
whom you would like to

offer Sternin's review  
when the Living becomes  
vacant. That you will  
cast a favorable eye upon  
him. I feel sure you  
will not regret the  
choice as wherever he  
has been he has got  
on well with all parties.  
I am proceeding to you a  
copy of my paper on  
Volcanos which the  
publisher has promised  
sent me to visit appear in  
the next volume of the  
Field Club. I expect rather  
a long one. I have now  
a hand on the Soil  
& Vegetation of the County &  
about I hope to have  
well illustrated will tell

up the Volume too much  
& will have to be postponed  
I have endeavored to make  
it dry a subject rather in-  
teresting, at all events it  
will be a good addition to  
the historical history of the  
County. It would be a  
grand thing for the Society  
if you would give a paper  
in this year volume. It  
will help us up the ladder.  
I regret to say Mrs. Maxwell  
Weydell makes no progress  
toward relief from some  
the constant strain upon  
her nerves & body by now  
month's nursing toll terribly  
on her. The weather is not very
