Dear Sir

I am extremely obliged by your keeping so many of the things I ventured to send you. I think you did right in keeping the Stone Club. it is to my mind unique - I have never seen one before & of course could have sold it readily, but your kindness to me compels me to submit to you anything I may get that appears of interest, before

Showing it elsewhere.

Canon Greenwell writes me to day that Sir John Evans said when he presented the Canon's portrait, that the Canon had a finer English bronze coll<sup>n</sup> than Sir John, but that Sir John had a finer foreign one.

The Canon certainly has the finest series of swords I have ever seen, both in condition & variety, but I think the Knockan Spear head fig 411 Evans Bronz. is without exception the finest piece of bronze work

I have never handled. & the rich golden colour is exquisite  
 To show the curious coincidence of types - I got him some years ago - a spear head from the Thames identical with one he has from Eford Northumberland fig 405. he said they might have been made in the same mould. This is curious, as the type is very unusual.

I am extremely obliged to you for the cheque to hand

I beg to enclose receipt.

With Compliments & many thanks

I am

Yours obediently

W. Lawrence

Mr. Boynton has permission  
to finish the excavation  
at the so called "Dance  
Graves" where he found  
the enamelled wheel headed  
pin I wish him every  
success.
