Museum & Public Library.

Maidstone

October 4<sup>th</sup> 1898

Dear General Pitt Rivers

I received today with the greatest interest your fourth volume of "Excavations" for the Reference Library of the Museum, and send herewith an official acknowledgment.

Having the three previous volumes on my own shelves, I am sure you will not think <sup>it</sup> selfish in asking you for an unbound copy for myself. I

have

course be on the Committee, at least I, personally, hope you will.

I don't know whether or not you are digging anywhere now, but if not and you could spare the time, I should be very much obliged if you could measure my bronze age shell from Lynton with your aneroid.

I trust you are well.

Yours very truly

Richd. V. Jones.

At General A. Pitt Rivers F.R.S. &c &c

only just had time to look through the  
work hastily this afternoon, but I am sure  
that it is full of most important matter.

It was now my good fortune to be present  
at the digging of Warburton much as I  
always wished to do, so I shall follow  
your account of the work most keenly,  
knowing the ground thereabouts so well.

I came upon a plate wrongly inserted  
by the binders. Instead of Plate 309 being  
page 194, they have put in Plate 255.

The next quire beginning with your  
address to the Institute has also  
been missed in the stitching. I

mention this as you <sup>may</sup> wish to write  
to Hurisani as to taking more care.

I had a special call  
from Dr. Green this afternoon relative  
to my undertaking to superintend  
some excavations of a Committee of  
the British Association about to be  
made to ascertain the "Age of Stone  
Circles". A grant of 20£ was made  
at Bristol at the last meeting, for the  
purpose, and I understand <sup>now</sup> that I shall  
be invited to confer with the members  
of the Committee as to which monument  
is to be attacked first. You will of
