WHATCOMBE

BRANDFORD

October 31-1894

My dear and kind friend

Now my son has
swept aside every obstacle
which stood in his way
of accepting your most
kind & generous offer of
staircase. I shall
your kindness I shall
him within a little
more than an hour's
distance of what could

I am most grateful
to you & hope in a very
short time to tell you

I'm so personally of
you are well enough to
see me.

I have finished Combes -
ditch in your plan of
parallel dipping - by
which I was able to examine
every spar-fall. The 30
feet yielded only fragments
of a human pelvis showing
the 2 acetabula - pointed
nothing else - not even a
skull of pottery. I will
send you the plan, measure-
ments + photographs
+ the course of a few days

when the latter is developed
with great earnest
hope that you are better
than when Johnson was
at Rushmore. I very kind
regard of Mrs. H. P. P.

I remain
Sir, your affectionately
J. Mansel-Pleydell
