My dear General,

I return you very hearty
thanks for your kind gift of volume
to your press work. I am
glad I asked for it.

I sincerely hope that your
fear that your health may
prevent your doing much more
work in Archaeology may not be
realized, and that you will have a
speedy recovery from your present

itself and for many years become
our unrivalled master in the
art of exploration and in the
science of recording the results of
the explorations made.

Yours sincerely

Edw Forster
