St. Fiacre

Finisterre.

27 July - 1886

My dear Sir

Owing to the death of the
old Monsieur du Chateleur of
the Chateau de Kernuz, near
Pont Labbe, I was chosen as one
of the experts to value his fine
collection of antiquities etc etc.

I think you told me when
at Huelgoat that you had visited
this collection, and I recollect your
showing me a portion of a gold
chain (found in that neighbourhood)
which you had bought at Trimpes.

allow me to ask whether it has
a clasp or hook to attach it by when

When worn, as the silver Smith
you bought it from says it had. —

M. du Chatellier has the other half
of the same chain about a foot in length.

This silver Smith obtained it from
a little girl, who found it in a field
which had just been ploughed up,
and gave the child a trumpery
silver ring for it pretending that
it was not gold! — Since then the
child has become "a domestique" in
M. du C's family and related this
circumstance &c.

He M. du C. would like to know
if your portion had really a clasp
or hook of any kind — also the
length of your portion.

He has sent you a copy of
his pamphlet on the unique
Membre found in 1878 at
Kervadel en Doubaunee and
(now set up in M. de C's grounds)

far from Pout Labbe', but it may
have been returned as my last
letter to you of the 29th May last
as they were addressed to Pengwern
Road: with the words "Gone away"
written on the back of the envelope.

Yesterday heard from my brother
at Wath near Ripon & he gives me
your address 4. Grosvenor
Gardens, so I lose no time in
writing for the above information.

Hoping that I am not giving
you too much trouble

Remain yours very
truly J. H. Lister.
