

Dorchester. Apr. 23. 1884.

My dear Sir,

(L297)

Your letter of Apr. 21 has just arrived & I hasten to thank you for it & for the enclosed medal. It is an admirable idea to record your excavations for the information of possible future searchers. This specimen of the medals used for the purpose shall be carefully placed in the Museum and labelled.

The persistent survival nowadays of small remnants of formerly prevailing races (the Bushmen e.g.) seems to give probability to your

supposition that the Bushmores
tribe may have been of Neolithic
blood.

I am

yours truly

A. J. Moule

Major Genl. Pitt Rivers. R.A.F. R.S.
