

L316

WHATCOMBE,
BLANDFORD.

June 13 1887

My dear General Pitt Rivers

We had a good
business meeting with the
Field Club at Dorchester Th
Friday. As usual Com
has prepared to be visited
on one of our days this
summer. I reminded the
members that I wished
the visit to be delayed until
we had time to give the
plant a thorough exa-
mination. Some of them
said you had done this
to I was slightly non-plused
and it ended a cherry
Com for our last day subject

to you appeared. I read
my paper on the newly
discovered Roman road -
& what it was satisfied
they show that there
was a Roman Town a
direct communication
with the sea at Hamantsly
through the County beyond
the boundary & the
direction of both after the
jubilee which I am therefore
well in hand at hand I
shall endeavor to have
it on.

I am so glad to hear of
you continued success &
nothing. I think you read

many in as it does
with the Via Secura
at Blandford will prove
that important work
I have been the Vindolanda
Station of Antonine the
Waller you see of London
reminiscent of the Stone-River
I believe me

Yours truly
A. M. M. M. M.
