

L317

WHATCOMBE,  
BLANDFORD.

June 24. 1867

Dear General Pitt Rivers

I only returned home  
last night and had no time  
in fulfilling my promise to  
send you an abstract of Prestwich's  
paper & the discussion it caused  
at the Geological meeting last  
month. I left London some  
time I intended owing to the  
indisposition of my wife. I  
thought he was so old  
but seeing that he is the  
is not the same for the present  
of heat. What creatures of  
circumstances are we?  
I also enclose you an excerpt  
of the earlier part of my paper  
on the Romes-road.

I remain

Yours very truly

J. Mansel-Pleydell
