University Museum, Oxford,  
Department of Medicine and Public Health.

Nov 25 1887

My dear friend Mr. Peory

I cannot help  
writing an additional  
private line of thanks,  
besides this present one,  
for I have been very  
anxious, in many  
ways, about the end

of our last meeting.  
I hope all will be  
greatly amused for the  
present, as the  
next innovation, like  
it is over & cannot  
tell. The Deane & others  
do and have done  
all in their power

I am  
I should be glad to hear  
from you with respect  
to the  
Wm. A. Deane

to the Scholam, Historians  
& Psychologists to throw  
out, and directed all  
to the whole University.

And I took occasion to  
say, that Rollinton (whose  
wide culture & high cha-  
racter ~~they~~ many now  
were apt to forget) had  
been most anxious to  
promote, with you, this most  
important indeed highest  
branch of Biology.

Private Ans?

L421a

by you  done by

Hydeparment Pitt Rivers,

I am much obliged  
by your kindness in writing  
to me, and in sending me  
also your Address, which I  
shall read immediately.

The debate in our Province  
then concluded rather an  
affair which had caused me  
more anxiety than any they  
which occurred for a long  
time. I am almost tempted

wrongly that you were  
down.

Pray forgive my  
saying so much. But  
the development of their  
work has been to me  
a source of deep <sup>lifelong</sup> interest  
and historical value  
and untiring and an  
abiding joy & work

I am, dear friend, All Yours

Wm Brewster
