

L460

February 1st 1888

Teffont Rectory
Salisbury

Dear Sir

I have received your
letter this morning and thank
you for your kind invitation
which I shall be glad to
accept. If convenient to
you I propose to come over
next Thursday week. -

February 9th, and to
stay the night.

The two enquiries you
make are of great interest,
and it will be a great
pleasure to me to go over the
ground, and have some
conversation about them.

I have noticed on that
narrow water shed, on the

used for mending the roads
road a heap of hard chalk.
Could you tell me, when I
see you, where it comes from?

And if you have any fossils,
even if only picked up off the
field, I should much like to
see them, as they might be
some guide to the horizon.

I remain

Yours truly

W.R. Andrews
