As I cannot find any examples of arrow heads here. Such of your Pitt Rivers left casts of with me to turn off I shall be glad if you will send me a sketch of what the heads should be & cannot pick the exact form out as there is no certain form left of it - on the casts, & I should like to have them quite right. The difficulty lies in the extreme head of the thing it may be like the under you & R. R.

Mr. Shanks can't say what the exact form was he thinks that they are Roman<sup>ish</sup> British I think they are very rare are they not !!
