

L 500

WHATCOMBE,
BLANDFORD.
AND TELEGRAPH

June 10. 1879

My dear General Pitt Rivers

Mr Lyell's letter of
the B. Museum with whom
I am corresponding about some
Pterisaurian remains in a
postcard which I enclose except
some doubt about the Sloophead
paper being read. mentioned by
the last meeting - a lot will
be hurried through & I fear
if read the Sloophead - will not
be discussed if so it will
be important as there are
so many interesting phenomena
connected with the bed in
which the remains lay. The presence
of Pterisaur (whom I believe will
be present) might - I think must
light upon its origin. It will
be cleared with you while
to leave you need not be
kind at Blandford Dyke - p. ac

UNCOYALL
unfortunately. I am full
of rapturous joy your success
and the full and true of the
erroneous idea of Walm
as to its Pre-Brown date.
I regret to hear that S. Smith
is a student - but faith and
more student to be, will have
to give us the delightful
part of the story in the
due relation of the various
with your villages - and you
are much to be congratulated
on this account -

I told the members of the
Trust that at the last meeting
that you would be glad to
receive them when the first
been be clear out and a
through examination and
you in &c. Hence
A. S. Mearns - Myrdals
