

2586
58 Acre Lane, London

Ans^d

S.W.

Nov 15 - '88

Dear Sir,

Acting on your suggestion, I have made copies, (two only, for the moulds, were accidentally destroyed) of the remarkable round bottomed urn, and of the small 4 looped urn, from Kingston Deverill. One of each I have given to Mr. Franks, and one of each I have sent to your address, by parcels post, this afternoon. As they are from your own

neighbourhood - almost
within the limits of your
your own archaeological
preserves, they will I
hope be of interest to you.

As they are from the
specimens in the Society's
Museum, I have mentioned
the circumstances to Mr.
Smith.

You will find the notice
of these vessels, in *Anc. Wills*,
I - 45, 46 - a note on the
convex one p. 46 -

I am having them, and
the large "double" urn from
Crendon, photographed and

wish to mention them
in a note in the *Wills Mag.*

I remain

Dear Sir

Your faithful servt.

W. Cunnington

The process used I have
found useful in modelling
delicate objects - to cover
them with tissue paper,
before taking the mould.
