

brick tiles, each of different
size the largest 11 inches
square; They were laid
edge-ways and about 8
inches apart from each
other. There were also found
ashes, but no deposit
we dug down as far as
the iron broken chert that
was about 3 1/2 feet from
the surface.

Yours

My dear General
I am very sorry

V. K. Maclure - Memphis

I regret to say how soon I am
there in any letter about the
county (Council). The worst coming
& the worst of states (as yet I have
no opportunity) I shall do all in
my power to get the state assembly

Hotel Metropolitan
London - J. W.

WHATCOMBE,
BLANDFORD.
—AND TELEGRAPH—

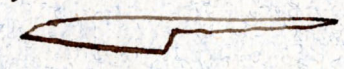

2609
Dec 5. 1880

My dear General Pitt Rivers

I was very glad
to receive your kind letter
but much wish you could
see your way to take the
Presidency of the Field Club
I am going to see Sir
James Clark this morning
who will give ^{me} my mittimus
within the better or for ever
I expect the little squirrel
stone must have got shaken
out of the slit & on opening
the box it probably fell
out, in which case the

I think your dear hand will help the rest
1880

It is a small one, perhaps
break it up on the carpet
The top is of no consequence
whatever, it would only
have illuminated found
its way into the Society
Museum. I shall send
the molar of Stephan me-
donalis to the British
Museum. which is figured
in the last Quarterly
geological Journal. It can
you have not got it. I
shall forward you a separate
copy. That word has
found a rough tepealated
pavement at Crick which
I hope may prove to be the

remains of a Roman Villa.
By the by: I was able to
creep up to the Roman
well & found my informant
wrong about the approach
to the well. The semi circle
of brick tiles appears to have
been a cist. close to the
opening was a Sarsen stone
about the size of a man's
head - & in the center of
the circle another Sarsen
stone only much smaller
with a few rough flints &
an iron knife 
similar in shape to
to one figured in your
Woodwith volume. The
