

I trust I am not asking
too much, when I say
that I should very much
like to possess a copy (if
you have one to spare)
of the results of the Bakerly
Excavations &c, (knowing how
so much to do with the work)

Also any paper or work
you may have published on
the "Development of the
Cross"

Mr. Reader called on
me the other evening & was
very much pleased with the
paper on "King John's House", and
said how much he would like to
have a copy. I told him I would
ask you and if you can spare him
one, I will hand it to him.

By permission of
Mrs. G. G. G. G. G.

Genl. Pitt-Rivers

Sir

I have just completed
my first 12 months with
Messrs Waterlow & Sons, and
you will be interested to know
that I am getting on very well
indeed.

I am glad to say
I get a great variety of
work, the majority of which
I am able to do justice
to.

Very long drilling of careful
draughtsmanship whilst with
you I find helps me to
do this.

Private
Lately I have been
engaged on some work
of W. Flinders Petrie, in
connection with his discoveries
in Egypt.

We are reproducing (I
reducing) several plates by
photo lithography from his
own drawings, and as a
good many will be eventually
published in the original
colours, this necessitates
a lot of very careful work

on stone.

In the course of my
work on the above I noticed
~~several~~ ^{a small} cross forms represented
several times amongst other
symbols, which I thought
perhaps might interest you.

No doubt you will receive
a copy of this work when
published, so will not
object to my calling your
attention to it.

We have no particulars
or letterpress referring to
the drawings, so I do not
know the meaning of
the representation of the
cross.
